HIZBULLAH RAZIK
UNDERGRADUATE IN SOFTWARE ENGINEERING

I am an enthusiastic student actively seeking a Software Engineering internship. With a strong foundation in data organization and expertise in developing web applications using React, I bring a solid understanding of building REST APIs using Java Spring Boot for backend development. Eager to apply my skills to real-world projects, I am excited about contributing to dynamic teams and making a positive impact in a forward-thinking organization.

EDUCATION

2023-2025
Coventry University
BSc (Hons) Computing (Software Engineering) (Present) 3rd Year

2021 - 2022
National Institute of Business Management (NIBM)
Diploma in Software Engineering (Completed)

2020 - 2021
National Institute of Business Management (NIBM)
Certificate in Computer Science (Completed)

SKILLS

- Programming Languages: Java, JavaScript
- Web Development: HTML, CSS, ReactJS
- Database Management: SQL
- Version Control: Git
- Backend Development: Spring Boot
- Frontend Development: React, Tailwind CSS
- Object-Oriented Programming (OOP) Principles
- RESTful API Design and Development

PROJECTS

- Web application for an **Food App** using **ReactJS** and **Tailwind CSS**

- Built a **Shopping Cart** website using **ReactJS and Tailwind CSS.** The app will fetch the data from a 3rd party RESTful API for products.

- Developed a **Notes App** using **ReactJS** and **CSS**, allowing users to easily create, edit, and delete notes. The app provides a user-friendly interface for managing personal notes efficiently.

- Built a REST API using Spring boot for Employee Management System. It allows one to search for an employee, fetch all employees, get a single employee, create an employee, update, and delete an existing employee.
